TERM 1

- year 7 Preparation -

name: _____

Welcome to the Year 7 Preparation Skills Program. These sheets are designed to give you multiple opportunities to learn and revise key mathematical skills. Completing these sheets will help you become equipped with the skills you need to be a successful user of mathematics in secondary school and also every day life. The following points will help you get the most out of the program. Enjoy!

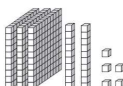

- When you see the  symbol include some working to support your answer. This could involve a calculation, annotating a diagram or an explanation of your thought process.
- You may be able to complete very few questions or almost all of them, it doesn't matter. As long as you give your best effort and try to improve each time you are maximising your success!
- If you feel that some or all of these questions aren't suitable for you, have a chat with your teacher.

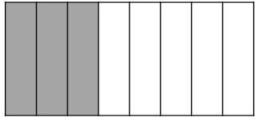

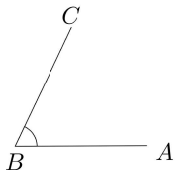

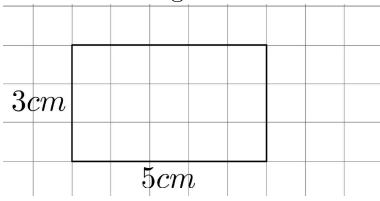

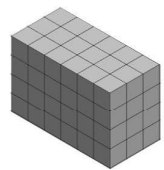

In most cases you will complete one sheet each week. To further support your learning your teacher may set additional tasks for you to complete. If your school has a Mathsquad Subscription this task could require you to access your school's Mathsquad skill development page. Your teacher will inform you of your school's webpage URL and password. Please write these down in the space below for easy reference.
