

mathsquad

-times table training-

name: _____

Welcome to the Mathsquad Times Table Training Program!

This program is designed to improve the speed in which you can recall your times tables. As you may already be aware, times tables are used in so many areas of mathematics, so investing time into learning these facts is incredibly worthwhile!

This booklet contains worksheets that, when combined with the focus table practice, take about 10-15 minutes to complete and is set up for you to complete 5 sheets each week. Learning your times tables is not an overnight process, but by using the strategies in this booklet you will get there!

*10-15 minutes a day
5 days a week
You will achieve great things!!*

To complete this program you will need the following...

- This booklet
- A timer (an oven timer or smart phone perhaps)
- A calculator (or smart phone perhaps)
- 2 different coloured pens
- A highlighter

When will I do my times table training?

Aiming to complete your times table training every school day could work well for you as then, if needed, you can use the weekend for catch up days. Doing your training at the same time each day is also likely to make it easier to remember. You could even set an alarm or put your materials in a place that will help you remember to practice at your chosen time. If appropriate for you, use the space below to record when and where you plan to complete your times table training.

Okie doke, turn to page 2 and let's get started!

Step 1: ★ Complete the Quiz of 90 times tables questions using a timer and 2 coloured pens ★

1. Set your timer for 5 minutes.
2. Go through the 90 questions and write down the answer the questions you know instantly from memory.
3. Change pen colour and answer the skipped questions using a mental strategy or your calculator.
4. Stop when the timer goes off.

Step 2: ★ Correct your Quiz (if self-marking refer to the Times Table Training Solutions booklet) ★

Step 3: ★ Head to the back page to document your progress and select a times table you want to improve ★

Congratulations! You have completed 25 sessions of times tables training!!! Woo hoo!!

It is likely that you have made some incredible improvements in the speed in which you can recall your times tables and this is wonderful!

I've included two more times tables quizzes on these pages. If you are able to instantly recall the answer to every question your times table training is complete! If you're not there just yet you might like to print another copy of this booklet and keep taking steps towards being able to instantly recall your times tables.

If you have completed your training and want to make sure the facts stay fresh in your mind you might like to head to <https://mathsquad.org/TTP>. At the very bottom of this page, in the answer to the final Frequently Asked Question, you will find a Quick Quiz booklet with 40 extra times tables quizzes (and of course a Quick Quiz Solutions booklet too). It is recommended that you continue practicing your times tables 3-5 days each week.

Time:				

★ Instructions for Step 3 ★

1. Document your score in the Score Tracker chart.
2. Using the Modified Multiplication Grid, work along each row and highlight the times tables you knew from memory. Stop once you reach a question you can't instantly recall.
3. The row of the first question not highlighted decides your **Focus Times Table**.
Improve your focus times table using one or more of the following:
 - Play Hit the Button <https://www.topmarks.co.uk/maths-games/hit-the-button> "times tables"
 - Create flash cards with question on one side, question and answer on the back. Quiz yourself or have someone quiz you.
 - Focus on strategies using the google sheet at <https://mathsquad.org/TT-Strategies>

Note 1: If you get to a point where you can do all 90 questions within 5 minutes start using a stopwatch (a timer counting up) and document your time instead of your score in the Score Tracker chart.

Note 2: Once you know all your times tables from memory you will no longer need to complete Steps 3, 4 and 5.

Score Tracker
